

Codebook – Uttar Pradesh

Description

Prayas (Energy Group) conducted a survey of 3,000 households in semi-urban and rural areas of Uttar Pradesh and Maharashtra to understand their energy end-use patterns. The survey was conducted in February-March 2019. This codebook contains data from this survey, for the households that were surveyed in **Uttar Pradesh**.

This dataset has 1,520 observations and 343 variables. Variables are identified by their name, followed by a description or the question which they correspond to, summary statistics about the variable (data type, mean, standard deviation, missing data, percentiles) and value labels.

Detailed analysis and insights from this dataset can be seen [here](#).

For any comments and questions about this codebook, please email: energy@prayaspune.org.

February, 2020.
